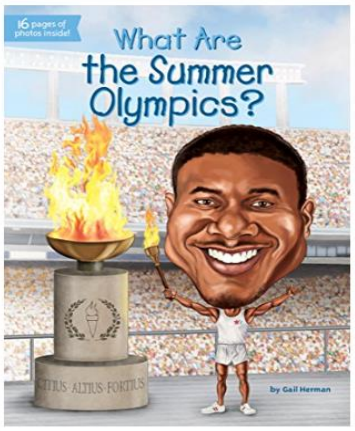
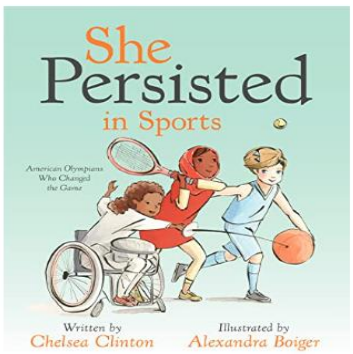
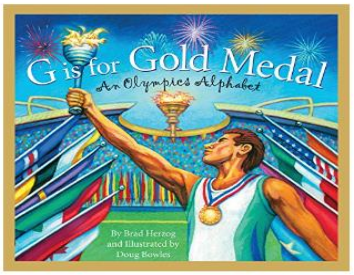
Summer Senses

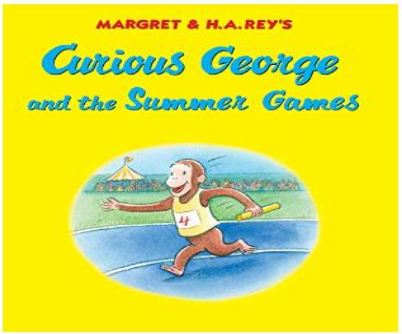
In the summer I see...	In the summer I feel...
In the summer I smell...	In the summer I hear...
In the summer I taste...	

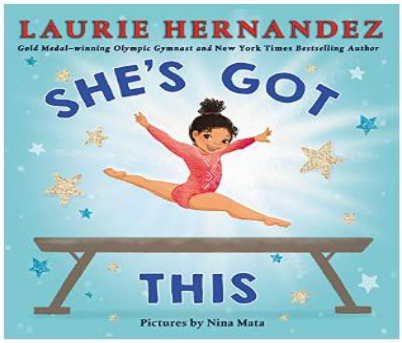
Books about the Olympic Games

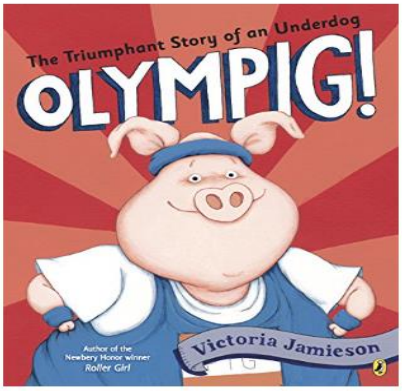


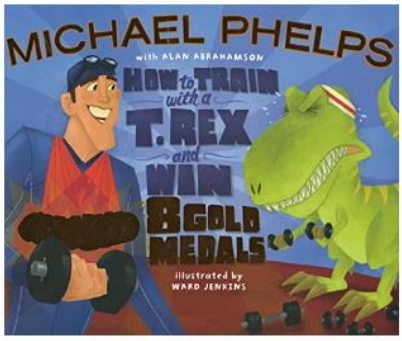


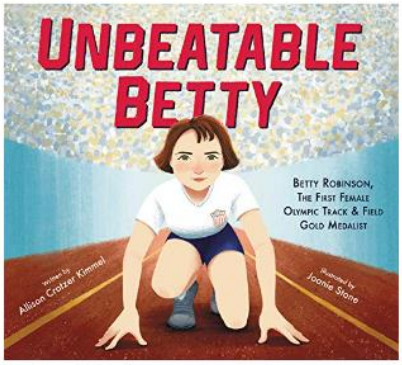


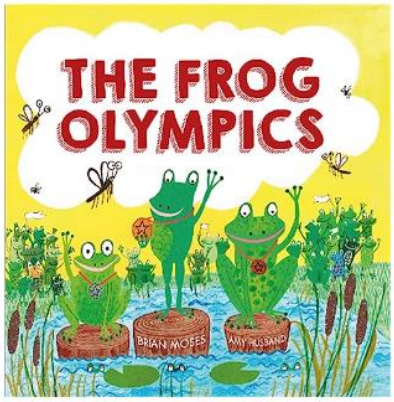


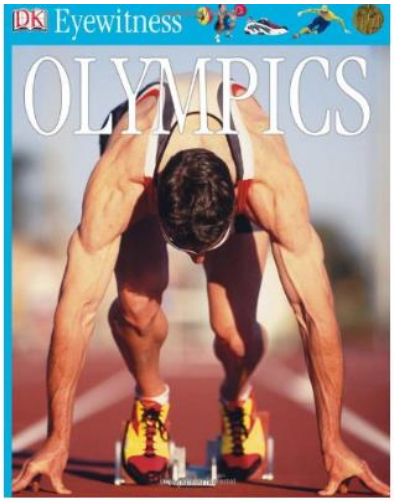












Olympics-Inspired Activities for Kids

Map Host Cities

We know it seems a little obvious to start with geography, but then again, if it's obvious can we really leave it off the list? Mapping the various locations of the Olympic Games host cities around the world helps kid build their spatial reasoning skills while also making sense of their place in the world. You can get a full list of host cities from the Olympic Committee, including future cities.

If you have a map of the world in your classroom, you can make this a classroom activity, adding pushpins to the spots where athletes have competed. You can also print out individual world maps for your students to label individually.

Learn About the Olympic Rings

The Olympic Rings are iconic. Made of five interlaced circles, each a different color, the rings debuted at the 1920 games in Antwerp Belgium. The rings represent five continents (yes, two of the seven are missing), opening up discussions about everything from the continents to basic shapes, depending on the age level of the kids you're teaching.

Olympic Ring Writing Activity

The five continents represented in the Olympic rings are Europe, Asia, Africa, Australia, and America (North and South America are combined). Teach your students about the meaning of the five rings, and challenge them to write a persuasive letter to the International Olympic Committee, explaining why another continent should be added to the rings.

Cause and Effect Matching

Directions: Cut and paste the correct cause or effect where they should go.

Cause		Effect
It was very hot outside.		
		We collected seashells on the beach.
It was the 4th of July.		
		I got a bad sunburn on my back.

It was low tide and the water level was low.

I forgot to put sunscreen on at the pool.

We went to a fireworks show.

My popsicle melted before I could eat it.

#1

Subtraction Problem Search

Directions: Hidden within this puzzle are 17 subtraction problems. They may be positioned horizontally (left to right), or vertically (up to down).

13	12	5	7	7	4	3	8
−							
10	7	4	3	5	13	5	8
=							
3	3	8	5	3	7	8	13
5	1	4	4	8	13	4	6
1	6	6	3	6	7	4	7
6	2	11	1	2	6	3	8
3	4	3	8	9	5	4	5
3	3	8	2	8	4	4	3

Magic Squares

Directions: Fill in the missing spaces in the magic squares. Each row, column and diagonal must equal the **magic sum.** You can only use a number once!

Magic sum= **15**

4		2
	5	7
8	1	

Magic sum= **21**

10	3	
	7	
6		4

Magic sum= **18**

		3

14	10	
	18	8

Almost Fourth Grade!

June - Sum Summer Fun - Week One

		Work Space
Monday	Measure your height today. Record how tall you are.	
Tuesday	Weigh yourself today. Record the results in the work space.	
Wednesday	List at least 5 math terms. Give an example and illustration. Two examples are done for you in the work space. You can use a separate piece of paper.	multiplication 2x4  hexagon Thursday	List five food items that can be used to illustrate fractions. For example a mandarin orange.	
Friday	Choose 3 digits. Arrange them to make as many three-digit numbers as possible. List your numbers in order from largest to smallest.	

Almost Fourth Grade!

June - Sum Summer Fun - Week Two

Work Space

Monday	Which three numbers have a sum of 23? Prove it! 11 8 4 6	
Tuesday	Is the dotted line a line of symmetry? Explain your answer.	Wednesday	Estimate the length of your kitchen table. Measure. What is the difference between your estimate and the actual measure?	
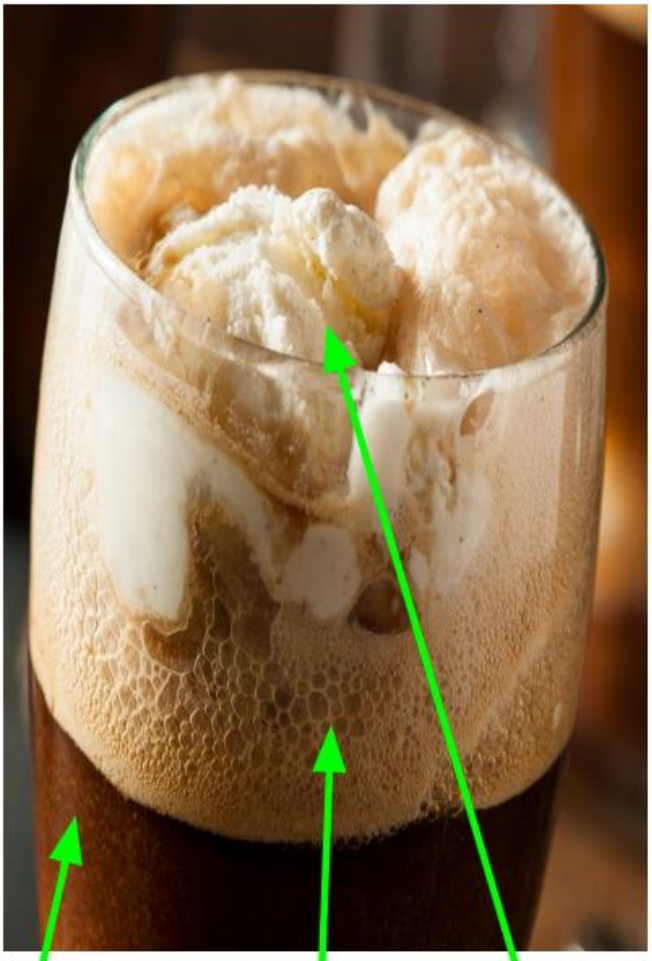
Thursday	Write your phone number. Add the digits. Do the same thing for a friend's phone number and a relative's phone number. Whose number has the greatest sum?	
Friday	What do we call a square, rectangle, rhombus, rhombus, and trapezoid? How are they the same?	

States of Matter

Directions: Follow the directions to make a sweet treat that will keep you cool this summer.



1. Take a cup and add 1 scoop of vanilla ice cream.
2. Pour root beer over the ice cream and watch what happens.
3. Label the photo with the correct states of matter.

Root Beer is a _____

Ice cream is a _____

Bubbles are a _____

Give another example of each state of matter:

Solid:

Liquid:

Gas:
